De-Duplication
Introduction

IP might have more than one IP numbers. Biometrics & photograph is captured in one card while IP is using other (multiple) TIC for medical & cash benefit. Suppose this IP visits Pehchaan camp again, for getting Pehchaan card on new TIC, duplicate records, based on biometric, will be identified.

Going forward duplicate IP numbers will not be able to avail benefits through ESIC application.

Duplicate IP numbers have many disadvantages, some are listed below:

- Using multiple IP numbers leads to:
- Loss of work history
- IP may lose Insurance benefit
- IP may loss Medical History
Types of Duplicate IP number

Duplicate IP numbers are further divided into:
- Normal Duplicate: Contribution coming on only one IP number
- Exception Duplicate: Contribution coming on both IP numbers

Both duplicate cases will be treated differently in application.
